Reinvigorate your
body with the
ultimate choice
in showering

The majority of our thermostatic shower valves are manufactured in Britain and undergo rigorous testing on site. We invested in the latest state of the art testing equipment to ensure our own Valquest showers provide the ultimate in safety and performance.

For further peace of mind the UK showers are proud to have the highest TMV quality approvals. All showers made in the UK are clearly identified with the Made in Britain and TMV logos. As you would expect from a British manufacturer we offer a full range of shower solutions from concealed minimalist to multi showering options, all of which benefit from the latest technology.

Innovative SHOWERS

Why choose an Ultra Finishing Shower?

Safety First

Your safety is important to us, which is why the majority of our showers are thermostatic, to safeguard against accidental scalding. All our concealed twin, triple and dual control showers are also TMV approved - meaning they have been tested to the highest industry standards to provide safe showering for all the family.

Co-ordinating Taps

Our ability to offer complete co-ordination for your bathroom gives you the opportunity to tailor your chosen look with matching taps to suit your shower.

The Latest Designs

Our shower collection covers all the latest trends, including slimline, contemporary square, crosshead, and stylish lever design options

MADE IN BRITAIN

Direct From Us to You

We are proud to manufacture our thermostatic twin and triple showers at our site in Halifax, Yorkshire - using the patented Valquest cartridge to create a shower you can depend on. There are no middle-men, our dedicated team manufacture the showers here in Britain, ready to ship straight to you via our national network of retailers.

Product Innovation

We are dedicated to bringing you the latest designs using up-to-date technology. The new product design team benefits from a design process audited to ISO9001 standards, meaning each product is designed, sourced, evaluated and warehoused to the highest standard.

ecoflow

Water Saving Showers

At Ultra Finishing we are committed to helping our customers to be more water efficient. To reduce the amount of water your shower uses, opt for our water-saving slide rail kit, which uses air induction technology to reduce water usage by up to 25%. Alternatively, you can fit one of our 'eco-flow' regulators to any shower hose, to limit the flow of water to 6 litres per minute.

20 YEAR 10 YEAR 5 YEAR

Peace of Mind

Our showers are tested to stringent quality standards, so we are confident of their ability to last, enabling us to offer market-leading guarantees. Our state-of-the-art testing facilities enable us to test the endurance and performance of our showers to ensure they comply with industry standards.

The power behind your shower

There are lots of reasons to choose an Ultra Finishing thermostatic shower - safety, contemporary design, co-ordinating taps and market-leading guarantees. Even better, our shower valves are also great for your installer, meaning less time and therefore less cost to you! By installing one of our shower valves, you can enjoy the following benefits:

MADE IN BRITAIN

Our twin, triple and dual control showers are manufactured in Halifax by a dedicated team. We are proud to be members of the Made in Britain scheme – look out for the ‘Made in Britain’ logo on all relevant showers.

INDUSTRY CERTIFIED

Our concealed twin, triple and dual control shower valves are TMV and WRAS approved.

WRAS Appropriate products have been extensively tested by the WRc and are approved or pending approval to comply with the Water Regulations Advisory Scheme.

TMV2 approval means the shower will maintain the pre-set temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding.

TMV3 approval means that the shower meets Government health & safety requirements for use in public places such as schools, hospitals etc. Together, they ensure that our showers offer peace of mind and safe showering for all the family.

SAFETY FOR ALL THE FAMILY

- Thermostatic control to +/- 2 degrees even if the temperature or incoming pressures fluctuate
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- In the event of hot or cold water failure, the valve will shut down the water supply

RELIABILITY

- Accurate flow control
- Excellent flow rates – even at low pressure. Ultra showers can deliver 5.5 litres of water per minute at 0.1 bar pressure
- The patented Valquest cartridge is highly resistant to calcium build-up – even in hard water areas

Installation made easy

Ultra Finishing Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas
- Thermostatic control to +/- 2 degrees even if the temperature or incoming pressures fluctuate

How to choose your shower

When deciding what style of shower you require, you need to determine the type of water heating system you have in your home. You should ensure that your system has adequate pressure to operate the shower you choose.

This will affect your choice of shower and the shower's performance. To identify the type of system you have installed, there is a guide outlined here. You could also ask a qualified installer or call our technical and spares department on 01422 417110. This will ensure you pick the correct shower and enjoy your showering experience to its full potential.

GRAVITY-FED SYSTEM

Low Pressure

If you have a cold water tank in your loft and hot water cylinder (usually found in your airing cupboard) then you have a gravity fed system.

Recommended For

Suitable for all LP1 and LP2 combinations. For all our MP and HP combinations, you may need to use a suitable shower pump to give the required pressure for optimum performance.

MAINS SYSTEM

High Pressure

If you have a combination boiler or instantaneous gas water heater (multipoint heater) then you have a high pressure mains system.

Recommended For

Suitable for all of our shower systems.

UNVENTED SYSTEM

High Pressure

If your hot water is stored under pressure in a cylinder (usually situated in your airing cupboard or garage) you have a high pressure unvented system.

Recommended For

Suitable for all of our shower systems.

Water Pressure Guide:

LP1 0.1 Bar Minimum LP2 0.2 Bar Minimum MP 0.5 Bar Minimum HP1 1.0 Bar Minimum HP2 2.0 Bar Minimum

pioneer

Tomorrow's shower technology today

Introducing a new concept in showering from Ultra Finishing - the Pioneer Valve is injection moulded from a high grade engineering polymer.

Innovative

A first in the market, with a state-of-the-art patented design

Indestructible

Pioneer is highly resistant to calcium build up, can withstand pressures of up to 25 bar and is temperature resistant up to 85 degrees.

Dependable

We offer a lifetime guarantee* on the main Pioneer shower valve body against faulty material or manufacturing defects.

Safe

Partnered with the proven patented technology of the Valquest thermostatic cartridge.

Environmentally Friendly

The Pioneer Valve is 100% recyclable and manufactured in the UK, reducing its environmental footprint.

Future Proof Polymers

Engineering polymers are quickly becoming the material of choice in global aerospace applications. These materials are able to maintain their exceptional properties even when exposed to elevated temperatures and aggressive fuels. Typically, an engineering polymer is chosen for its range of enhanced physical properties and can replace traditional engineering metals such as, aluminium, Mazak, brass and some steels. Other properties exhibited by various grades of engineering polymers include high heat resistance, mechanical strength and rigidity etc.

* Products must have been installed and commissioned fully in line with manufacturers' fitting instructions. The product must be used in a normal domestic application. Guarantee excludes serviceable parts, neglect or misuse, as well as any consequential loss.
