

Whether you want subtle mood lighting or focussed task lighting, our collection has something to transform your bathroom

Lighting

The right lighting scheme can transform your bathroom with carefully chosen products fitted in clever and creative ways.

Our comprehensive range includes stylish over cabinet lights, white, chrome and glass shower lights and LED plinth and strip lights. All designed specifically for the bathroom to the highest safety standards so you can plan your new bathroom lighting with confidence.

By Style

- 118 / Safety & Lighting Zones
- 119 / Cabinet & Mirror Lights
- 120 / Ceiling & Rechargeable Lights
- 121 / LED Lights & Accessories

FEATURING

Hudson Reed

Shine A LIGHT

Clean & Bright
A pure light shines from the Neptune lamp bringing a cool finish to any bathroom

Safety Assured

Our lighting range has been designed specifically for use in the bathroom. Our low voltage products have a minimum rating of IP44 to give you additional confidence. The connectors on our fittings and distribution blocks on our drivers also have a minimum rating of IP44, meaning they can be located in Zone 2 areas of the bathroom. We strive to ensure the highest confidence and ease of installation.

Lighting Zones

ZONES EXPLAINED

Safety is the main concern when considering bathroom lighting. Bathrooms are divided into **ZONES 0, 1 and 2**, based on their likely exposure to water. Only use light fittings in the zone for which they are designed. The main light should be switched on by a pull cord or switch outside the bathroom. The window recess is classed as **ZONE 1**.

PLEASE NOTE: The classification of bathroom zones has changed, **ZONE 3** no longer exists, but references to it may still appear on product packaging.

ZONE 0 **Z0**

Is the smallest volume that contains the bathtub, shower, basin etc. *Minimum rating of IP67.*

ZONE 1 **Z1**

Is the area above **ZONE 0**, up to a height of 2.25m above the floor. *Minimum rating of IP44.*

ZONE 2 **Z2**

Is the area above **ZONE 1** up to a height of 3m, as well as the area that is horizontal within 0.6m from **ZONE 1**. If the space under the bath cannot be accessed without using a tool, then that space is considered as un-zoned. *IP rating of at least IP44 is required.*

We have stated on each product which zone they are suitable for if restrictions apply.

Lighting Types

COB LED LIGHTING

A selection of our lights feature COB LED technology to ensure the brightest light output and longest lifespan. COB (Chip On Board) is the very latest technology when it comes to LED lighting. COB lamps consist of a higher number of LED chips, which are packed together to form one lighting module.

KEY FEATURES OF COB LIGHTING ARE:

- Enhanced efficiency
- Higher light output than SMD LED chips
- Longer lifespan
- Uniform appearance
- Same light output as a halogen lamp at a fraction of the energy usage, saving you money on energy bills

Cabinet & Mirror Lights 2 YEAR

LED COLOURS

Some of our LEDs are available in two colours, Cool White and Warm White so that you can choose the look you prefer. The images to the right show the difference in cool and warm light.
