The majority of our thermostatic shower valves are manufactured in Britain and undergo rigorous testing on site. We invested in the latest state of the art testing equipment to ensure our own Valquest showers provide the ultimate in safety and performance.

For further peace of mind the UK showers are proud to have the highest TMV quality approvals. All showers made in the UK are clearly identified with the Made in Britain and TMV logos. As you would expect from a British manufacturer we offer a full range of shower solutions from concealed minimalist to multi showering options, all of which benefit from the latest technology.

Why choose an Ultra Finishing Shower?

Safety First

Your safety is important to us, which is why the majority of our showers are thermostatic, to safeguard against accidental scalding. All our concealed twin, triple and dual control showers are also TMV approved – meaning they have been tested to the highest industry standards to provide safe showering for all the family.

The Latest Designs

Our shower collection covers all the latest trends, including slimline, contemporary square, crosshead, and stylish lever design options.

Co-ordinating Taps

Our ability to offer complete co-ordination for your bathroom gives you the opportunity to tailor your chosen look with matching taps to suit your shower.

Direct From Us to You

We are proud to manufacture our thermostatic twin and triple showers at our site in Halifax, Yorkshire - using the patented Valquest cartridge to create a shower you can depend on. There are no middle-men, our dedicated team manufacture the showers here in Britain, ready to ship straight to you via our national network of retailers.

Product Innovation

We are dedicated to bringing you the latest designs using up-to-date technology. The new product design team benefits from a design process aligned to ISO9001 standards, ensuring each product is designed, sourced, evaluated and warehoused to the highest standard.

Water Saving Showers

At Ultra Finishing we are committed to helping our customers to be more water efficient. To reduce the amount of water your shower uses, opt for our water saving slide rail kit, which uses air induction technology to reduce water usage by up to 25%. Alternatively, you can fit one of our ‘eco-flow’ regulators to any shower hose, to limit the flow of water to 6 litres per minute.

Peace of Mind

Our showers are tested to stringent quality standards, so we are confident of their ability to last, enabling us to offer market leading guarantees. Our state-of-the-art testing facilities enable us to test the endurance and performance of our showers to ensure they comply with industry standards.
Installation made easy

Ultra Finishing Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn’t need re-plumbing. Simply remove the cartridge, turn 180° and replace.
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas.
- Full thermal protection to prevent scalding even in the event of hot or cold water failure.
- Thermostatic control to +/- 2 degrees even if the temperature or incoming pressures fluctuate.

MADE IN BRITAIN

Our twin, triple and dual control shower valves are manufactured in Halifax by a dedicated team. We are proud to be members of the Made in Britain scheme – look out for the ‘Made in Britain’ logo on all relevant showers.

INDUSTRY CERTIFIED

Our concealed twin, triple and dual control shower valves are TMV and WRAS approved.

WRAS appropriate products have been extensively tested by the WRC and are approved or pending approval to comply with the Water Regulations Advisory Scheme.

TMV2 approval means the shower will maintain the pre-set temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding.

TMV3 approval means that the shower meets Government health & safety requirements for use in public places such as schools, hospitals etc. Together, they ensure that our showers offer peace of mind and safe showering for all the family.

SAFETY FOR ALL THE FAMILY

- Thermostatic control to +/- 2 degrees even if the temperature or incoming pressures fluctuate.
- Full thermal protection to prevent scalding even in the event of hot or cold water failure.
- In the event of hot or cold water failure, the valve will shut down the water supply.

RELIABILITY

- Accurate flow control.
- Excellent flow rates – even at low pressure. Ultra showers can deliver 5.5 litres of water per minute at 0.1 bar pressure.
- The patented Valquest cartridge is highly resistant to calcium build-up - even in hard water areas.

If you have a cold water tank in your loft and hot water cylinder (usually found in your airing cupboard) then you have a gravity fed system.

Recommended For

Suitable for all LP1 and LP2 combinations.

For all of our shower systems.

If your hot water is stored under pressure in a cylinder (usually situated in your airing cupboard or garage) you have a high pressure unvented system.

Recommended For

Suitable for all of our shower systems.

If you have a combination boiler or instantaneous gas water heater (multipoint heater) then you have a high pressure mains system.

Recommended For

Suitable for all of our shower systems.

Water Pressure Guide:

LP1: 0.1 Bar Minimum
LP2: 0.2 Bar Minimum
MP: 0.3 Bar Minimum
HP1: 1.0 Bar Minimum
HP2: 2.0 Bar Minimum

Innovative
A first in the market, with a state-of-the-art patented design

Indestructible
Pioneer is highly resistant to calcium build up, can withstand pressures of up to 25 bar and is temperature resistant up to 85 degrees.

Dependable
We offer a lifetime guarantee* on the main Pioneer shower valve body against faulty material or manufacturing defects.

Safe
Partnered with the proven patented technology of the Yaqoost thermostatic cartridge.

Environmentally Friendly
The Pioneer Valve is 100% recyclable and manufactured in the UK, reducing its environmental footprint.

Future Proof Polymers
Engineering polymers are quickly becoming the material of choice in global aerospace applications. These materials are able to maintain their exceptional properties even when exposed to elevated temperatures and aggressive fuels. Typically, an engineering polymer is chosen for its range of enhanced physical properties and can replace traditional engineering metals such as, aluminium, Mazak, brass and some steels. Other properties exhibited by various grades of engineering polymers include high heat resistance, mechanical strength and rigidity etc.

* Products must have been installed and commissioned fully in line with manufacturers’ fitting instructions. The product must be used in a normal domestic application. Guarantee excludes serviceable parts, neglect or misuse, as well as any consequential loss.

Tomorrow’s shower technology today
Introducing a new concept in showering from Ultra Finishing - the Pioneer Valve is injection moulded from a high grade engineering polymer.

Electric Showers

• The convenience of an on/off button; after installation simply set the flow and temperature control to suit.
• Showering couldn’t be easier—instant hot water at the flick of a switch.
• A variety of neon indicator lights for peace of mind.
• Three power settings to ensure suitability through the seasons when cold water temperature fluctuates.
• A full set of accessories including a premium multi-function handset for a choice of water spray patterns.
• Can be fitted with left or right hand entry.
• Adjustable height to suit all the family.

• Sequential control shower valve for combined control of temperature and flow.
• Suitable for use with unvented supplies, combi boilers, gravity and mains pressure systems.
• Single-piece thermal cartridge technology.
• Factory set at 43°C to prevent scalding.
• Temperature stability of ±1.2°C.
• Fail-safe on hot and cold supplies.
• Operating pressure range of 0.1 to 10 bar.
