ecoflow FLOW RESTRICTORS

We all need to reduce the amount of water we use - the average person in the UK uses approximately 150 litres of water every day. This level of consumption is unsustainable and reducing the amount of water we use is no longer a choice - it is essential.

We offer a range of 'Eco-Flow' water regulators, which restrict the maximum flow rate to 6 litres per minute to help save water. The flow regulators are a quick and cost effective way to reduce your water usage.
